Serial No.: 10/849,294

Amendments to the Claims:

Please amend the claims to read as follows. This listing of claims replaces all prior

versions and listings of claims in the application.

Listing of Claims:

1. (Currently amended) A method for synchronizing a first artifact and a second

artifact, the first and second artifacts being interdependent and concurrently each artifact

being modified independent of a modification to the other artifact after a last

synchronization, the first and second artifacts each having a plurality of elements and

being of different formats, the method comprising:

performing a reverse engineering operation to generate a temporary artifact

having all the elements of a last synchronized version of the first artifact and having all

the elements of a latest version of the second artifact transformed as the first artifact:

merging the temporary artifact and a latest version of the first artifact to create a

synchronized version of the first artifact; and

performing a forward engineering operation to generate a synchronized version of

the second artifact having all the elements of the latest version of the second artifact and

having all the elements of the synchronized version of the first artifact transformed as the

second artifact

(Original) The method of claim 1 wherein one of the first and second artifacts is a

software model artifact and the other of the first and second artifacts is a code artifact.
